

## Pan-Canadian Health Network

What are the **objectives** of the proposed team?

- The main objective is to design and develop the infrastructure for a Pan-Canadian network designed for Healthcare professionals, researchers and all related stakeholders to interact and collect data from.

What are the **biggest challenges** your proposed team has to overcome?

- The largest challenge currently being had is the issue of user adoption.

Which **organisations** are part of the team?

- Vibes Group
- Health Quality Innovative Collaborative (HQIC)

How will your team **contribute to a transformation** in adolescent mental health in 5 years?

- Our team is looking to collaborate with other groups and help create the necessary lean infrastructure to allow for a cost effective delivery of services. By working with groups from the beginning we can help deliver a realistic understanding of the potential costs the be incurred during the development of their network. This will help keep all creations viable.

**Who are the key leaders** in your team?

Sanjeev Goel is a family physician practicing in “downtown” Brampton for over the past 10 years. Currently, Dr. Goel is the Lead Physician for the Wise Elephant Family Health Team in Brampton. He also works as a Rehab hospitalist at William Osler Health System, is a Coroner for the Region of Peel and is the Primary Care Lead for the Central West Diabetes RCC.

Jaipaul Massey-Singh has been the chief operating officer for Banerjee Goel Medicine Professional Corporation for 4 years and Executive director of the Wise Elephant Family Health Team. He currently sits on the Brampton board of trade as a director. He also sits on the committee of adjustment as a committee member.

Orren Johnson has been in the software and application development for close to three decades. His knowledge infrastructure development has allowed him to help design the architecture behind products specifically designed to help the healthcare industry leverage the latest technological advances

What expertise, skills, resources, networks or infrastructure **could your team bring** as a network collaborator ?

- Our team has extensive experience with collaborating with professionals within the healthcare industry. These collaborations revolved around the designing and development of the infrastructure necessary for them to deliver their services.

Who should other interested groups **contact** to learn more about you? (include phone/ e-mail)

- To discuss potential future collaborations we can be best reached at:
- 416-899-0780 or email us at [orren.johnson@vibesgroup.ca](mailto:orren.johnson@vibesgroup.ca)
